Rear-Viewing Camera

COMPACT PIPE RANGER REAR VIEWING CAMERA

The unique, illuminated & rear-viewing color camera can be used with both aluminum and brass CPR transporters!

Specifications - General:

The WM325 CPR rear-viewing, color camera is designed for use on aluminum and brass CPR transporters for 6" and larger configurations. The rear view camera is mounted to the CPR transporter to help avoid obstacles and potential tip-overs in the pipeline by providing visibility when retrieving the transporter or driving in reverse. Installation instructions will be added to the CPR User Manual, P/N WM901.

Retrofit Kits:

For K2 systems: Existing CPR transporters must be sent in to CUES for rear cover modification

For Non-K2 systems: Existing CPR transporters must be sent in to CUES for rear cover modification. Retrofit Kit P/N WS902-4 is available to convert the truck PCU for front/rear camera selection.

System Configuration:

WM325 - CPR Rear-Viewing Camera Assembly

Design Specifications:

- a 12-pin to CPR rear-view adapter cable with locking connector is included with the assembly
- use with new/used steerable multi-conductor CPR transporters
- use with or without the CPR manual/power lift
- LED lighting contains (12) 1W LED's
- waterproof, aluminum construction
- available in NTSC video format
- recommended for 6" and larger diameter pipe
- modular design uses two captive screws for quick installation
- front/rear camera image is switched from the K2 controller (Game Pad or hand-held controller), truck panel, or PCU switch depending on the system configuration
