# Welcome to **CUES** News

## NEW! Carbide-Toothed Wheels

CUES introduces [new carbide-toothed wheels](#) as an effective alternative to other CUES 8" wheels. The wheels increase traction when compared to traditional carbide or rubber coatings in both PVC and clay pipes. In addition, the carbide teeth maintain contact with the pipe surface, which helps maintain traction through debris and sewage. Teeth spacing

prevents clogging. These steel wheels are compatible with 8" configurations of the CUES SPR II, LAMP II, CPR, and WTR III systems. Other sizes are coming soon! To learn more about CUES products, [contact your CUES Regional Sales Manager](#).

### CUES EQUIPMENT ASSISTS IN CHILD RESCUE

A 13-year-old boy who fell into a sewer pipe during a family Easter celebration at Los Angeles' Griffith Park has been found alive. During the 12-hour ordeal, searchers and sanitation workers used **CUES CCTV pipeline inspection equipment** to view inside the pipelines. Hand prints from the boy were found on the inside of the pipe as he was being swept away were identified using the high resolution CUES camera. By following the hand prints, rescuers were able to locate the boy. [Click here](#) to view the video on the CUES YouTube channel.

### CUES 2018 Grout School

**CUES 2018 GROUT SCHOOL WAS A HUGE SUCCESS!** Avanti International, CUES Inc., and Logiball Inc., recently partnered together for its annual 2-Day Operator Grout Training in Tavares, Florida. It was a HUGE success with over 30 attendees! An emphasis was placed on the "how-to's" of grouting, safety, operating the equipment, testing and troubleshooting equipment, making sure the chemical grout mix was the right mixture, and how to determine how much grout is used per joint or lateral. [Click here](#) to read more. We hope to see you at the next event! For more information, contact your [CUES](#)

## DUC CAMERA FEATURED IN INFLOW & INFILTRATION MAGAZINE

Digital side-scanning is becoming more common as municipalities embrace new technologies that enable rapid assessment of pipelines and provides high-quality data to efficiently quantify repair and replacement needs. [Click here](#) to read "Best Practices: A Better View of Your Infrastructure", written by Chris Parker, CUES Florida Regional Sales Manager.
