**CUES K2 WIRELESS BASE STATION
Portable Pipeline Inspection System**

The CUES [K2 Wireless Base Station](#) is mounted in a compact, rugged, weatherproof enclosure and can fit into an ATV, van, or pick-up truck to access easements and hard-to-reach areas. Featuring wireless control, the unit operates all CUES transporters, cameras, and video cable reel functions to accommodate 6"- 200" pipe inspection. The reel features automatic payout with a capacity of 1700' video cable. Heavy duty welded lifting eyelets and forklift skids are provided for quick deployment to the host vehicle. To learn more about the CUES and it's products, [contact your CUES Regional Sales Manager](#).

MEASURING MANHOLES AT A GLANCE

The [CUES SPiDER](#) is the only truly wireless, color, manhole-scanning technology in a lightweight and compact form factor. SPiDER collects millions of three-dimensional (3D) measurements during each manhole inspection so the manhole can be measured to less than 5 mm accuracy. The June issue of Municipal Sewer and Water features a technology close-up of the SPiDER, featuring Q&A's with CUES Manhole Inspection Division Director, Pierre Mikhail. THE BEST TOOL FOR LATERAL SERVICE INSPECTIONS

The [CUES MPlus+](#) offers the most flexible and feature packed lateral and mini-mainline push system on the market. The MPlus+ modular design enables easy operation with its all-in-one set up, but additionally offers flexibility by quick removal of the control unit to be used separately. The MPlus+ XL push system includes a coiler configuration and pan and tilt camera designed for mainline and larger pipeline applications up to 500ft. Manufactured for rugged reliability and designed to handle rigorous field use, the MPlus+ is the most versatile push system available in the market today. [Contact CUES](#) for a free demo.
