WHY CHOOSE CUES? Straight From Our Employees

Why choose CUES? There are numerous reasons: quality, reliability, the best customer service, and so much more! CUES provides the most robust CCTV pipeline inspection equipment designed to get you the maximum footage per dollar and to ensure a return on your investment. Systems can be designed per your specific requirements to

accommodate various locations and conditions found in sanitary and storm sewers from 4"-200" diameter. CUES employees also stand behind its products and services! In this [CUES company video](#), hear what long-time CUES employees have to say about the company they work for! To learn more about the CUES and its products, [contact your CUES Regional Sales Manager](#).

UNPARALLELED PRODUCTION FOR LATERAL LAUNCHING & CROSSBORE INSPECTION

The [CUES LAMP II](#) (Lateral and Mainline Probe II) is an inspection tool for identifying infiltration and inflow, potential crossbores, pipe defects, and structural conditions in lateral services and mainlines. The LAMP II with optional mini pan & tilt camera will inspect lateral services and traverse multiple bends and wyes with or against the flow. Mainline inspection is accomplished with a pan, tilt and 40:1 zoom camera. The LAMP II can pull 1000ft video cable, reducing traffic control expenses, while increasing production. Please be advised that the inventory is constantly changing due to the acquisition of additional equipment on any given day. To verify availability and to take advantage of our inventory specials, contact the [CUES](#)

CUES IS IN THE NEWS

CUES equipment is mentioned in the Daily Republic newspaper that covers Solano County, California. A new \$316,010 CUES CCTV inspection van with robotic camera, recording system, and software has won approval for Vacaville's 267 miles of underground sewers. The TV van will be used to detect sewer deficiencies and locate damaged pipes, leaks and obstructions. [Click here](#) to read the entire article.

IN CASE YOU MISSED IT LAST MONTH...

In the April CUESNews, CUES announced two new detailed CUESTIPs "How-To" training videos on TV cable repair. These videos provide complete step-by-step instructions on how to replace the cable end splice and pigtails. They include everything you need to know about replacing your gold TV cable end, such as necessary tools, how to solder, what length to cut, and more. [Click here](#) to watch the trailer video on YouTube. To view both videos in their entirety, send us an e-mail at CUESTIPS@cuesinc.com and we'll send you the links to view them now!
