Easement Roller

"The Standard of the Industry"

K2 Series

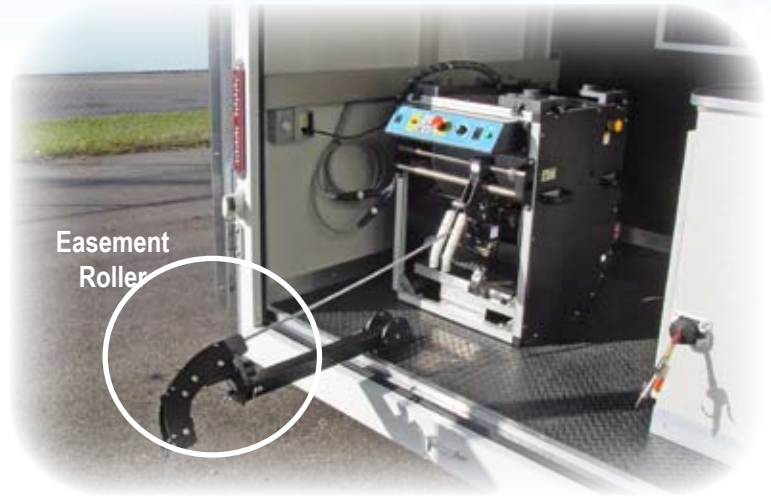

New Optional Equipment

Design Specifications:

Easement Roller

The easement roller was designed to facilitate ease of transporter deployment/retrieval from a truck-mounted K2 configuration.

- Stows in the upright position for convenient storage
- 180 degree range of cable trajectory to facilitate insertion in offset manholes in relation to the unit
- Quick-release pins speed set-up and stowage

System Configuration:

K2 Easement Roller:			
P/N	DESCRIPTION	QTY	COMMENTS
MD313	Assembly, Swing Arm, Sideloader	1	

Design Specifications:

Heavy-duty Handles

The heavy-duty handles were designed with hand grips for ease of transport.

- Heavy-duty handles with hand grips
- Equipped with quick-release pins for easy removal
- Field retrofittable

System Configuration:

K2 Handles:			
P/N	DESCRIPTION	QTY	COMMENTS
MD321	Assembly, K2 Portable Reel Handle	1	

"The Standard of the Industry"

K2 Series

New Optional Equipment

Design Specifications:

Truck-mount Frame with Drip Pan

The truck-mount frame is designed to anchor the K2 portable reel to the vehicle floor.

- Utilizes quick release pins and easy-release clamps for ease of removal or can be bolted for permanent mounting
- Additional bolt-on drip tray is available for greater sanitary use and ease of washdown

System Configurations:

K2 Truck-mount Assembly:

P/N	DESCRIPTION	QTY	COMMENTS
